### **DETAILED ACTION**

### Response to Amendment

1. The applicants' amendment filed 8/26/2005 has been fully considered and made of record.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 3. Claims 1-6 are rejected under 35 U.S.C. 102(a) as being anticipated by Applicants Admitted Prior (AAPA).

As applied to claim 1, The AAPA (Prior Fig. I-Fig. 4) teaches an in-line system used in a semiconductor package assembling process, the system comprising: a wafer loading unit for loading into the system a wafer having a back side which has not been subjected to grinding (12, Fig. 1); a wafer grinder for grinding the back side of a wafer (18) by the wafer loading unit (14); and a dicing tape attaching unit which attaches a dicing tape comprising one of a pre-cut dicing tape (see Application page 3, lines10-13) and a general dicing tape to the back side of the wafer after grinding by the wafer grinder (Fig. 1).

As applied to claim 2, The AAPA teaches wherein a lamination tape is attached to a top side of the wafer (12, Fig. 1), the wafer and attached lamination tape being

Application/Control Number: 10/607,600

Art Unit: 3729

loaded into the wafer loading unit so as to prevent contamination in the wafer grinder (see Application page 2, lines 12-13).

As applied to claim 3, The AAPA teaches wherein the wafer grinder includes a UV light radiating portion which irradiates UV light onto a top side of the wafer, so as to effectively remove the lamination tape after the grinding is completed (see Application page 2, lines 21-25).

As applied to claim 4, The AAPA teaches wherein the wafer after grinding by the wafer grinder has a thickness of 20-200 gm (see Application page 2, lines 3-4).

As applied to claim 5, The AAPA teaches which further includes a ring frame to which the wafer is attached, and an unloading unit which transfers the ring frame and wafer to a location outside the system (see Fig. 3 and Fig. 4).

As applied to claim 6, The AAPA teaches wherein the dicing tape attaching unit includes a tape loader which supplies one of the pre-cut dicing tape and the general dicing tape to the system (see Application page 3, lines 1-2).

## Allowable Subject Matter

3. Claims 7-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 10/607,600

Art Unit: 3729

### Response to Arguments

4. Applicant's arguments filed 8/26/2005 have been fully considered but they are not persuasive.

The applicant(s) argue that the AAPA does not teach the structure of "a dicing tape attaching unit structure of "a dicing tape attaching unit ... water grinder" (lines 7-8 of claim 1).

The examiner most respectfully disagrees. The AAPA surely teaches the structure of "a dicing tape attaching unit" (as shown in Fig. 1, element 18) that is capable of performing the function of "to attach a pre-cut dicing tape and a general dicing tape to the back side of the wafer after grinding by the wafer grinder". The examiner's position is that the structure of the AAPA's "dicing tape attaching unit" does not distinguish over the claimed "dicing tape attaching unit". The structure recited by the claims must be distinguishable from the prior art in terms of structure rather than function. In re Schreiber, 128 F.3d 1473, 1477-78, 44 USPQ2d 1429, 1431-32 (Fed. Cir. 1997).

The manner in which the device (dicing tape attaching unit) operates (i.e. constructed and configured ... grinder lines 6-8 of claim 1) does not differentiate over the structure of the prior art. Ex parte Masham, 2 USPQ2d 1647 (Bd. Pat. App. & Inter. 1987).

It appears that further structural limitations are needed in order to avoid the AAPA.

Art Unit: 3729

#### Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tai Van Nguyen whose telephone number is 571-272-4567. The examiner can normally be reached on M-F (7:30 A.M - 4:30 P.M).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Vo can be reached on 571-272-4690. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
